## VOLUME 01 • EDITORIAL PROLOGUE

# WHERE MINERAL BECOMES MONUMENT

*Architecture begins when two elements are placed carefully in dialogue. With continuous stone, it begins when the surface transforms the space.*

For centuries, interior architecture treated stone as an ornamental afterthought—a veneer sliced thin and glued over lumber. Today, a quiet structural revolution has inverted that hierarchy. Sintered porcelain slabs and 93% pure quartz crystal monoliths now define the volumetric gravity of the modern home.

From 3.8-meter Calacatta waterfall kitchen islands in Surrey to quad-bookmatched sintered porcelain living salons in Chicago, this volume celebrates surfaces engineered not merely to perform, but to evoke atmosphere. Every slab produced at Sheen Overseas embodies high-density compaction, pristine purity, and enduring elegance.

*“A GREAT ROOM DOES NOT SHOUT WITH CLUTTER; IT RESOUNDS WITH THE SILENT CONFIDENCE OF HONEST GEOLOGICAL SCALE.”*

## FEATURES • ISSUE 31

---

12

### STYLE FILES • COHESIVE LAYERS

Impactful powder rooms, layered textures, and subtle quartz countertops as grounding anchors.

---

18

### FEATURE • TIMBER & STONE

Midwest to Mediterranean: pairing organic dark hardwoods with Calacatta Noir and Breccia mirror slabs.

---

26

### FEATURE • THE MODERN MONOLITH

3.8-meter continuous waterfall islands, mitred aprons, and boardroom tables in engineered quartz.

---

36

### IN-DEPTH • THE CALACATTA & CARRARA CHRONICLES

The symphony of fluid veining: Taj series high-contrast drama versus Safa understated poetry.

---

44

### FEATURE • SHARED SANCTUARY

Zero-grout master bathrooms: carved shower stone, floating double vanities, and seamless hygiene.

---

52

### PORTFOLIO • THE NOCTURNE PALETTE

Midnight Marquina and obsidian lightning veins across penthouses, cocktail bars, and private lounges.

---

58

### PORTFOLIO • THE ART OF BOOKMATCHING

Symmetrical mirror-matched twin and quad slabs forming continuous geological tapestries.

---

62

### SOURCEBOOK • MASTER PRODUCT DIRECTORY

Complete specification matrix of all 48 Quartz Stone designs and 162 Slab Tile export formats.

SHEEN OVERSEAS PUBLISHING • VOL. 31

A NOTE FROM THE PUBLISHER

# DESIGNED TO CONNECT

Fall reminds us of the profound importance of home—the spaces where we gather with family and collaborators, share a meal, and retreat from the relentless velocity of modern life. In this edition of Sheen Style, we celebrate deliberate design that evokes warmth, poise, and genuine geological permanence.

From tactile honed suede countertops that invite your fingertips to monumental sintered walls that eliminate visual seams, the projects featured in these pages demonstrate that stone is not merely a hard surface—it is the emotional canvas upon which light, shadow, and human connection unfold each day.

*“TRUE LUXURY IS EFFORTLESS PERMANENCE: SURFACES THAT ENDURE SPILLS, HEAT, AND DAILY LIFE WHILE REMAINING BREATHTAKINGLY PURE.”*

We invite you to explore this inaugural monograph as both a technical resource and an inspirational volume for your upcoming architectural commissions.

# TIPS FOR INSPIRED LIVING

Layering contrasting minerals creates rhythmic depth in open-concept floorplans. Explore four cornerstone quartz compositions.

**CALACATTA ROYAL®**  
Taj Series • 1600x3200 mm • 20mm/30mm • Polished

**SAHARA DUNE®**  
Sahra Series • 1600x3200 mm • Honed Suede Finish

**DELICATE DARK®**  
Safa Series • Charcoal Mineral Weave • 20mm

**STARLIGHT WHITE®**  
Najm Series • Optical Mirror Flecks • Polished

VEIN DYNAMICS • OPTICAL PRECISION

# THE GEOMETRY OF LIGHT & VEIN

Natural marble veins occur randomly, often creating structural fault lines where water and grease can penetrate. Sheen Overseas quartz stone reimagines this fluid geological dynamic: robotic mineral injection ensures deep, through-body veining without compromising tensile strength.

When direct morning sunlight strikes the slab at a 45-degree incidence, the optical clarity of the 93% pure silica crystals allows light to penetrate up to 1.8mm below the surface, producing a soft internal luminosity that printed surfaces cannot replicate.

**SURFACE HARDNESS: MOHS 6.5-7.0**

SUPERIOR TO GRANITE • ZERO CHEMICAL SEALANT REQUIRED

MATERIAL SCIENCE • MOLECULAR INTEGRITY

# THE ALCHEMY OF 93% QUARTZ

Engineered stone is often misunderstood. In primitive manufacturing, high resin contents resulted in discolouration and thermal sensitivity. Sheen Overseas employs advanced Breton-style vibro-compression technology in an absolute vacuum chamber under 100 tons of hydraulic pressure.

The outcome is a virtually zero-porosity monolith (<0.02% water absorption rate) where pure natural quartz crystals are locked into an unyielding geometric matrix. Bacteria cannot harbor, red wine cannot stain, and knives cannot scratch the surface.

**93%**  
NATURAL SILICA QUARTZ

**<0.02%**  
WATER ABSORPTION RATE

**52 MPa**  
FLEXURAL RUPTURE STRENGTH

MONUMENTAL GEOMETRY • SEAMLESS SCALE

# THE 3200 × 1600 MM CANVAS

5.12 square meters of uninterrupted continuous stone. The jumbo format frees architects from seam compromises.

CALACATTA LINEA® JUMBO SLAB (1600 × 3200 MM)

## STYLE FILES • POWDER ROOM SUITE

## COHESIVE LAYERS

*A masterclass in modern colonial wainscoting, iridescent wallcoverings, and understated marble quartz.*

A discerning homeowner approached their architectural team to help create a retreat in their private suite—a powder room where they could lose themselves in sensory calm. The solution was a space appointed with impactful design choices: rich fluted wood, brushed unlacquered brass, and Sheen Overseas quartz stone providing a grounding contrast.

“I love the juxtaposition in the room,” explains the principal designer. “The bold, theatrical walls balanced against the crisp, serene countertop design on a masculine walnut vanity. The stone isn't fighting for attention; it anchors everything.”

*“WHILE WALLPAPER DEFINES THE DRAMA IN THIS BATHROOM, THE QUARTZ COUNTERTOP IS THE INDISPENSABLE ANCHOR.”*

place that reflect the opulence and  
even the exteriors matter a lot.  
rust and durable surface offering,  
specifically to fulfill the needs of an  
stable floor or facades, outdoor table  
will always be an exceptional choice.

ISLAND ARCHITECTURE • WATERFALL LEGS

# THE FLOATING MONOLITH

When creating an oversized freestanding island, fabricators require slabs with precise thickness calibration (+/- 0.5mm) to ensure mitered apron joints align with hair-thin precision.

Calacatta Serenity features soft caramel and graphite branch veining running smoothly from the horizontal work surface down through the 90-degree waterfall drop.

|                                                 |                                                    |
|-------------------------------------------------|----------------------------------------------------|
| MITER SPECIFICATION: 45° EPOXY-SEAMED WATERFALL | COMPATIBLE WITH UNDERMOUNT & DUAL-ZONE FLUSH SINKS |
|-------------------------------------------------|----------------------------------------------------|

## TEXTURE ANALYSIS • HONED SUEDE

## TACTILE SUEDE VERSUS MIRROR POLISH

**VELVET SAND®**

Najm Collection • Honed Suede Velvet Finish

While polished quartz reflects light with theatrical brilliance, the honed suede finish absorbs illumination, creating a velvety, soft-focus warmth reminiscent of raw limestone and aged riverbed silt.

**SAHARA DUNE®**

Sahra Collection • Warm Micro-Aggregate

Through specialised mechanical micro-brushing, Sheen Overseas achieves an ultra-smooth matte feel that resists fingerprint oils and smudges without requiring topical sprays.

FEATURE STORY • RESIDENTIAL ARCHITECTURE

# TIMBER & STONE

*A contemporary design narrative examining the rich dialogue between organic American walnut and monumental engineered mineral slabs.*

When an award-winning residential architect embarked on the restoration of a 5,000-square-foot woodland estate, the mandate was unequivocal: evoke the rugged warmth of surrounding timberland while delivering the crisp, unapologetic precision of modern architectural surfaces.

The solution was a disciplined palette threading Sheen Overseas quartz stone through the kitchen, butler's pantry, and great room fireplace. Rather than competing, the dark walnut millwork and luminous Calacatta veining elevate one another into a harmonious sculptural tableau.

timber & stone

MONUMENTAL HEARTH • DOUBLE-HEIGHT LIVING

# THE 6-METER VERTICAL HEARTH

Rising through a cathedral ceiling, this double-height fireplace surround features paired mirror-matched sintered porcelain slabs in Breccia Aurora. The continuous vein tracking creates an imposing geological wingspan that anchors the open living pavilion.

Engineered to withstand direct radiant temperatures up to 300°C without scorching or hairline stress cracking, Sheen sintered slabs require no combustible chemical sealants, providing complete peace of mind.

|                                              |                                       |
|----------------------------------------------|---------------------------------------|
| SLAB FORMAT: 1200 × 3200 MM (PAIRED SET A+B) | HEAT RATING: CLASS A1 NON-COMBUSTIBLE |
|----------------------------------------------|---------------------------------------|

SLAB EXHIBIT • SYMMETRICAL WINGSPAN

## BRECCIA AURORA A&B SLABS

MIRROR CUT FACING PAIR (2400 × 3200 MM TOTAL)

HOSPITALITY ARCHITECTURE • PRIVATE BAR

# THE NOCTURNE BUTLER'S PANTRY

Tucked discretely behind the main kitchen, the entertaining butler's pantry embraces the drama of dark mineral tones. Sheen Black Marquina high-gloss sintered slabs provide an impenetrable defense against red wine spills, bourbon drips, and citrus acidity.

The mirror gloss finish reflects the warm amber glow of integrated LED shelf lighting, transforming prep into a cocktail ceremony.

STAIN RESISTANCE: CLASS 5 (HIGHEST INTERNATIONAL STANDARD)

ZERO ETCHING FROM CITRUS JUICE • WIPE CLEAN

DARK LUXURY • JET MINERAL FIELD

## CALACATTA MIDNIGHT NOIR®

Midnight Noir captures the tension of dramatic lightning veining: crystalline white veins with subtle bronze halos fracturing across a deep obsidian stone bed.

Engineered in 20mm and 30mm jumbo slabs, it offers the ultimate dark countertop option without the soft porosity and scratching hazards of natural Spanish marble.

CURATED COMPOSITION • THE ORGANIC PALETTE

# TIMBER & STONE PALETTE

Four versatile quartz compositions engineered to harmonize seamlessly with natural walnut, smoked oak, and warm brass fixtures.

**CALACATTA LINEA®**

Taj Series • Linear Grey & Gold Vein • Polished

**MIDNIGHT OBSIDIAN®**

Sahra Series • Deep Charcoal Field • Honed

**FROZEN WHITE®**

Najm Series • Crisp Crystalline Matrix • 20mm

**CHARCOAL NOIR®**

Safa Series • Soft Granular Shadow • Polished

FABRICATION CRAFT • EDGE ARCHITECTURE

# THE ANATOMY OF THE EDGE

**45° MITRED APRON**

Creates the illusion of a monolithic 60mm to 100mm solid stone block without excess weight.

**EASED & CHAMFERED**

Crisp contemporary 2mm to 3mm radius that protects against edge chipping while maintaining clean lines.

**DEMI-BULLNOSE**

Soft, rounded upper edge allowing liquids to spill harmlessly without clinging to the lower cabinet face.

Because Sheen Overseas quartz slabs are through-body engineered, CNC edge profiling exposes the identical crystal structure, color pigment, and veining found on the polished top face.

There is no secondary surface layer to peel, chip, or discolor during 5-axis diamond profiling, waterjet cutting, or automatic edge polishing.

**FABRICATION ADVISORY:** Always specify two-part colour-matched methacrylate adhesive for seamless 45° waterfall returns and apron returns.

FEATURE STORY • MONOLITHIC SPACES

# ARCHITECTURE IN A SINGLE SURFACE

*How continuous 3200mm slabs transformed interior architecture from a mosaic of seams into an uninterrupted geological statement.*

For decades, the standard tile format constrained spatial ambition. Even oversized 600x1200mm floor tiles inevitably introduced hundreds of meters of grout lines—lines that fractured the visual continuity of large atriums and required chronic chemical bleaching.

The arrival of Sheen Overseas 3200x1200mm and 3200x1600mm slabs has permanently rewritten these architectural rules. A single slab now blankets an entire kitchen backsplash, ascends a double-height entryway, or clads a curbless master wet room without a single horizontal interruption.

*“WHEN GROUT DISAPPEARS, THE BRAIN STOPS READING TILES AND BEGINS EXPERIENCING SPACE AS CARVED GEOLOGY.”*

surfaces is a versatile one as  
in or usage criteria. It has the  
al part of your interiors without  
nt and water-resistant surface,  
n in all indoor areas including  
n furniture.

JUMBO SCALE • CALACATTA AURELIA®

## CALACATTA AURELIA® SLABS

Calacatta Aurelia is defined by bold, sweeping taupe and honey-gold ribbon veins coursing across a pure translucent milk-white crystalline field.

In oversized kitchen islands, its dynamic movement brings warmth to cold architectural minimalism, effortlessly bridging matte black cabinetry and blonde Scandinavian oak.

COMMERCIAL • EXECUTIVE SUITES

# THE HIGH-PERFORMANCE WORKSTATION

Modern executive workstations require surfaces that convey prestige while withstanding intense daily tactile use: laptop dragging, hot coffee mugs, and writing friction.

Sheen Urban Slate features an anti-glare honed micro-texture that diffuses overhead LED office lighting while delivering complete scratch immunity (Mohs 7).

APPLICATION: C-SUITE DESKS & BOARDROOM TABLES ANTISTATIC • NON-POROUS • INTEGRATED CABLE GROMMET FABRICATION

SLAB SPECIFICATIONS • SAHRA COLLECTION

## URBAN SLATE® & STONE ASH®

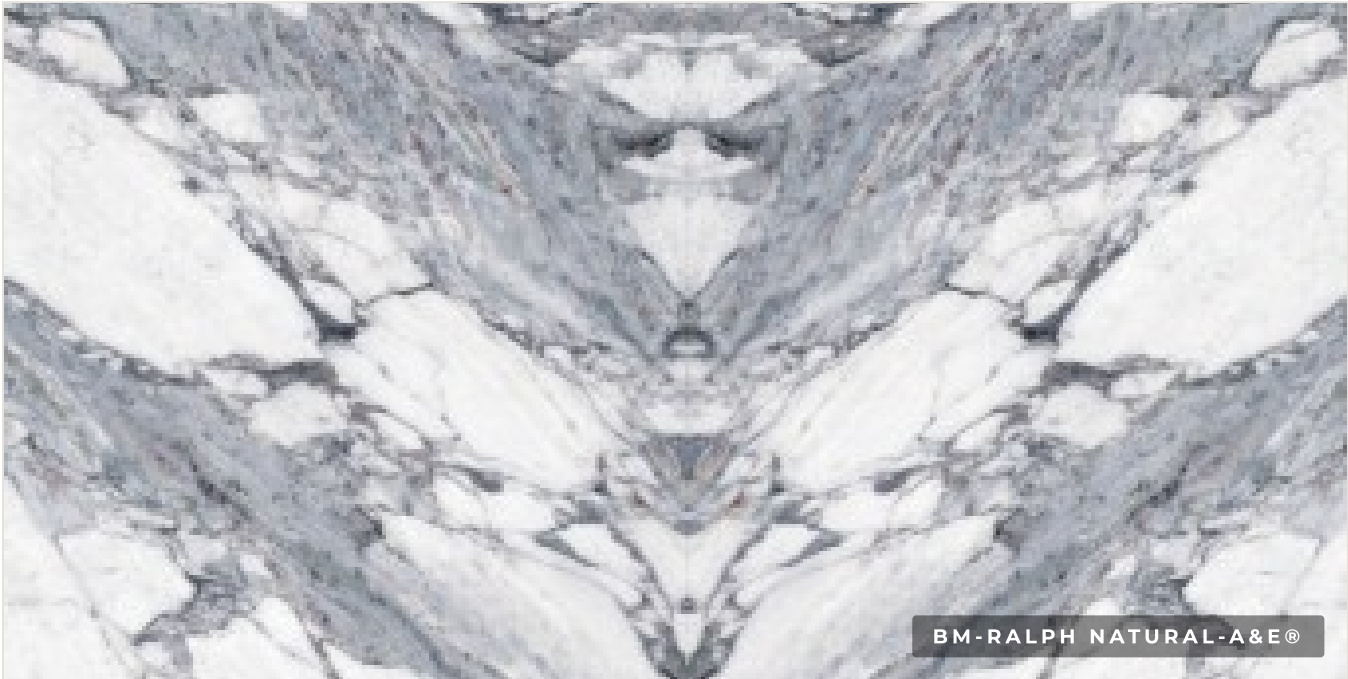

Engineered for high-traffic environments, both Urban Slate and Stone Ash utilize dark mineral aggregates with microscopic quartz quartzites that conceal minor dust and lint.

Their uniform density ensures uniform thermal conductivity, making them comfortable to the touch throughout long collaborative working sessions.

QUAD-BOOKMATCH • GRAND SALON

# THE 6.4-METER TAPESTRY

In this penthouse living salon, four consecutive sintered porcelain slabs form an uninterrupted 6.4-meter stone tapestry. Veins flowing from the lower-left slab travel seamlessly across all four panels to the top-right crown.

Using computer-controlled digital scanning during the glaze application, Sheen Overseas guarantees vein continuity across panel joints to within 1.5 millimeters.

|                                              |                                                          |
|----------------------------------------------|----------------------------------------------------------|
| WALL SPAN: 6400 × 3200 MM (QUAD SET A+B+C+D) | SINTERED PORCELAIN • 9MM ULTRA-SLIM WEIGHT COMPATIBILITY |

IDEAL FOR DOUBLE-HEIGHT ATRIUMS & CURVED RECEPTIONS

AVAILABLE WORLDWIDE • DIRECT FROM MORBI

HISTORICAL EVOLUTION • APUAN ALPS REIMAGINED

# THE SYMPHONY OF VEINING

*From the quarries of Carrara to Morbi's precision robotic compaction: how engineered mineral surfaces perfected natural marble.*

For millennia, Carrara and Calacatta marble held uncontested dominion over classical architecture. Yet for all their poetic beauty, natural calcite marbles bear severe structural vulnerabilities: extreme softness (Mohs 3), high porosity that drinks red wine and lemon juice, and unpredictable internal fissure lines.

The Sheen Taj and Safa collections resolve this historic tension. By harnessing 93% pure natural silica crystals (Mohs 7) bound under immense hydraulic compaction, our master engineers captured the delicate smokey veining and warm golden ribbons of Apuan marble while delivering absolute chemical immunity.

*“WE DID NOT SEEK TO IMITATE NATURE; WE SOUGHT TO PURIFY HER GREATEST AESTHETIC MOMENTS FROM VULNERABILITY.”*

SIGNATURE DESIGN • TAJ COLLECTION

## CALACATTA IMPERIA® SHOWCASE

Calacatta Imperia represents the pinnacle of our veining mastery: broad graphite and warm caramel rivers cascading across a pristine milk-white quartz matrix.

Engineered in bookmatched facing pairs, it allows architects to create continuous symmetrical waterfall islands and wrap-around kitchen backsplashes without veining misalignment.

JUMBO SLAB: 1600 × 3200 MM • THICKNESS: 20MM, 30MM

AVAILABLE IN 90° MIRROR POLISH & VELVET SUEDE HONED

SURFACE MACRO EXHIBIT • 100% SCALE

## COMPARATIVE VEIN MORPHOLOGY

Notice the fine micro-veins branching from the primary tectonic trunk in Calacatta Imperia. These delicate feathered capillaries create optical depth, suggesting millions of years of sedimentation.

By contrast, Calacatta Linea adopts a disciplined linear path, ideal for sleek contemporary cabinetry with horizontal grain and minimalist architectural profiles.

JUMBO SLAB GALLERY • 1600 × 3200 MM

## FULL-SIZE SLAB FORMATS

Full slab inspection reveals how vein density is calibrated across the perimeter to maximize yield during CNC fabrication, reducing offcut waste by up to 18%.

Both designs feature through-body color consistency, ensuring cutouts and undermount bevels match the polished face identically.

SAFA COLLECTION • UNDERSTATED POETRY

# THE WHISPERING SERENITY OF CARRARA

While Calacatta commands with bold theatricality, Carrara speaks in quiet cadences. For morning-lit kitchens, boutique library hearths, and Scandinavian master baths, loud veining can overwhelm the contemplative mood of the room.

The Sheen Safa collection pays homage to mist settling over Tuscany: soft feathered charcoal shadows dancing across an ethereal snow-white crystal ground.

SERIES: SAFA COLLECTION • 18 SIGNATURE DESIGNS      PERFECT COMPANION FOR FLUTED WHITE OAK & BRUSHED NICKEL

CARRARA EXHIBIT • SOFT VEIN DYNAMICS

## CARRARA AURA® & CARRARA CASCADE®

Carrara Aura features an exceptionally fine granular field punctuated by soft, smokey silver penumbras that drift horizontally across the slab.

When paired with integrated undermount sinks, the continuous veining carries through the bowl cutouts without abrupt color stops, creating a bespoke boutique feel.

SENSORY FINISH STUDY • TACTILE REFLECTION

# THE PSYCHOLOGY OF FINISH

**90° MIRROR POLISH**

Diamond-head polished to a 90-degree gloss reflectance. Accentuates mineral transparency, sharpens vein contrast, and maximizes natural bounce light in north-facing spaces.

**VELVET SUEDE HONED**

Mechanically micro-brushed to produce an ultra-smooth low-sheen matte surface. Eliminates glare, conceals water spots, and provides an addictive silk-like touch.

The choice of finish fundamentally dictates how a space feels at dusk. In sun-drenched architectural villas, honed suede surfaces absorb intense glare, preserving the relaxed, meditative atmosphere of the home.

In evening cocktail lounges and formal entertaining rooms, mirror polished slabs amplify candlelight and brass chandeliers, imparting a glamorous, jewel-box luminescence.

Both finishes undergo automated optical densitometry during factory crating to guarantee uniform sheen from corner to corner.

CURATED COMPOSITION • THE MARBLE ARCHIVE

# THE CALACATTA & CARRARA ARCHIVE

Four versatile stone solutions engineered to celebrate timeless Italian geology with 21st-century performance.

BATHROOM ARCHITECTURE • ZERO GROUT

# THE ELIMINATION OF GROUT

*Why premier architects are retiring traditional bathroom tiles in favor of continuous 3200mm sintered slabs and quartz panels.*

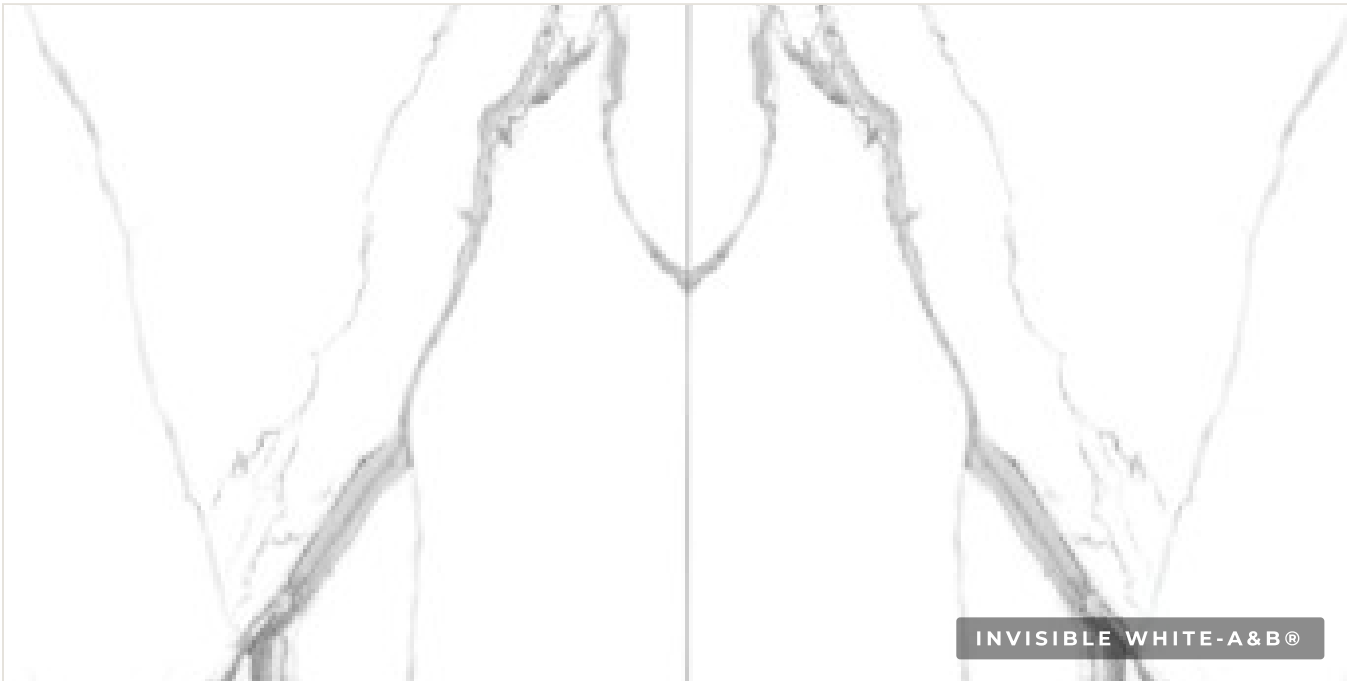

Bathrooms are defined by moisture, steam, and cosmetic oils. Traditional tiled wet rooms inevitably suffer from grout degradation: micro-cracks that harbor mold spores, soap scum buildup, and unsightly chemical efflorescence leaching through cement joints.

By specifying Sheen Overseas 3200x1200mm sintered porcelain slabs, an entire shower enclosure can be erected with just two seamless vertical seams. Water simply cascades down the non-porous glass-smooth surface into the concealed linear drain, creating an effortless spa experience.

*“I WANTED THE SHOWER TO LOOK LIKE A ROCK WE CARVED AND BUILT THE BATHROOM AROUND. NO GROUT. NO COMPROMISE.”*

SPA ARCHITECTURE • WET ROOM SUITES

# THE SEAMLESS WET ROOM

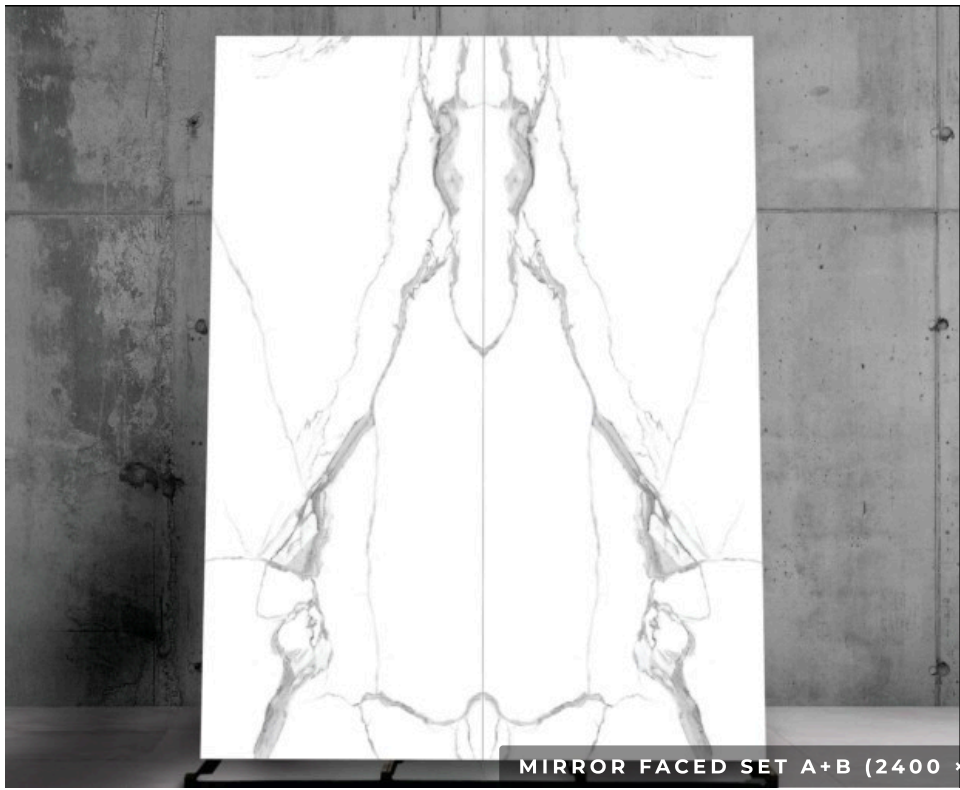

Full-height bookmatched sintered slabs transform a conventional shower into an immersive geological grotto. Floor-to-ceiling panels create the feeling of being enclosed within carved natural alabaster.

Because sintered porcelain is completely impervious to steam, moisture cannot penetrate to behind-the-wall substrates, protecting high-rise timber frames and luxury penthouse structures permanently.

|                                                         |                                                             |

BLACK MARQUINA® HIGH GLOSS SLAB

ARCHITECTURAL MONOGRAPH

DARK LUXURY • EVENING ARCHITECTURE

# MIDNIGHT IN STONE

*The psychological power of deep mineral tones in penthouse cocktail salons, home theaters, and executive boardrooms.*

While white marble evokes sunlight and classical equilibrium, dark stone unleashes cinematic intimacy. In contemporary hospitality architecture and evening entertainment suites, jet-black obsidian and deep charcoal quartz surfaces absorb extraneous visual noise, drawing the human gaze inward.

Natural black marble is notoriously fragile, prone to dull water rings and unsightly acid etching from citrus cocktails. Sheen Overseas dark quartz surfaces deliver intense, saturated blacks that remain impervious to lemons, limes, red wine, and neat bourbon.

*“BLACK STONE IS NOT THE ABSENCE OF LIGHT; IT IS THE ARCHITECTURAL STAGE UPON WHICH CANDLELIGHT AND LIQUID GLOW DANCE.”*

VEIN DYNAMICS • HIGH CONTRAST

# LIGHTNING FRACTURES ACROSS OBSIDIAN

Calacatta Midnight Noir captures the kinetic drama of thunderheads over a dark mountain pass: brilliant white-gold lightning strikes slicing through an impenetrable midnight charcoal matrix.

When back-beveled with an LED cove or paired with brushed antique brass bar fixtures, the high-contrast veining creates an electric visual dialogue.

SERIES: TAJ COLLECTION • JUMBO SLAB 1600 × 3200 MM

RESISTANT TO HIGH-TRAFFIC SCRATCHING (MOHS 6.5-7)

SLAB SPECIFICATIONS • NOCTURNE COLLECTION

## MIDNIGHT OBSIDIAN® & CALACATTA NOIR®

MIDNIGHT OBSIDIAN® SLAB

Midnight Obsidian delivers a uniform, pure mineral charcoal ground free of distracting cloudiness, making it the preferred choice for monolithic kitchen island returns and executive conference perimeters.

CALACATTA NOIR® SLAB

Calacatta Noir introduces dynamic movement with white branching networks that run continuously through the slab's 20mm and 30mm thickness.

STARLIGHT GREY®

Widely specified for hospitality cocktail bars, boutique hotel reception desks, and residential powder rooms, Starlight quartz adds a lively optical dimension to evening spaces.

RECYCLED OPTICAL MIRROR CHIPS • 93% PURE QUARTZ SILICA CERTIFIED GREEN BUILDING MATERIAL • LEED CREDIT ELIGIBLE

SYMMETRICAL GEOLOGY • THE RORSCHACH EFFECT

# SYMMETRICAL TAPESTRIES

*How consecutive mirror-matched slab pairs create mesmerizing biological symmetry in grand architectural spaces.*

Bookmatching is among the most demanding arts in stone manufacturing. It requires consecutive blocks to be cut, calibrated, and polished in exact mirror orientation—Slab A polished on its face, Slab B polished on its reverse—so that when placed side by side, their veining unfolds like the wings of a butterfly.

In double-height living salons, hotel lobbies, and master bedroom headwall niches, a bookmatched paired installation becomes an organic kinetic sculpture that captivates every visitor who enters the room.

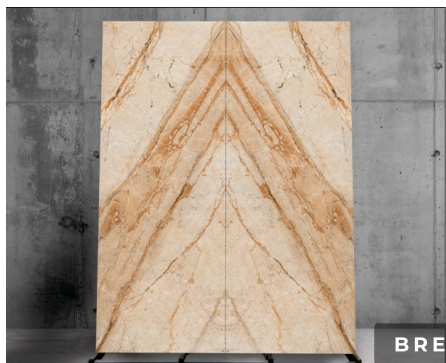

*“A BOOKMATCHED WALL DOES NOT MERELY COVER A SURFACE; IT ESTABLISHES A MAGNETIC AXIS AROUND WHICH AN ENTIRE VILLA REVOLVES.”*

GLOBAL LOGISTICS • MUNDRA PORT INFRASTRUCTURE

# OCEAN LOGISTICS TO 40+ NATIONS

## STEEL A-FRAME

Custom heavy-duty steel-reinforced timber A-frames preventing flex during ocean transit.

## ISPM-15

Full heat-treatment and phytosanitary fumigation certified for rapid European and US customs clearance.

## 140 KM TO PORT

Morbi plant situated only 140 kilometers from Mundra Deepwater Port, guaranteeing rapid sailing dates.

International slab transit demands uncompromised crating rigor. Each bundle is individually shrink-wrapped with desiccating moisture barriers and secured via high-tensile steel straps to internal container floor anchors.

Every crate undergoes calibrated drop testing and contains RFID shock-watch sensors to confirm pristine handling from Morbi factory floor to your jobsite unloading dock.

TYPICAL TRANSIT TIME: UK / ROTTERDAM 22 DAYS • NEW YORK / SAVANNAH 26 DAYS • JEBEL ALI 4 DAYS

FULL CONTAINER LOAD (FCL) & MIXED CRATE DISPATCH
